

MULTIFLEXI inverter

FEATURES

Combination flexibility: wall split, cassette, duct

Energy efficiency class in cooling mode: A

Energy efficiency class in heating mode (Intermediate climate area): A

Ecologic gas R410A

Multi-function remote control

24h timer

MultiFlexi Inverter DC Quadri 28 HP HE

+ Maximum of 4 interior units to be chosen from:

MultiFlexi Inverter DC Quadri 36 HP HE

+ Maximum of 4 interior units to be chosen from:

Warmer climate area

Intermediate climate area

Colder climate area

FUNCTIONS

Ventilation only function

Dehumidification only function

Auto function: adjusts operation parameters based on ambient temperature.

Sleep function: gradually increases the cooling temperature setting for greater comfort during the night.

Turbo function: activates maximum ventilation speed to reach the temperature setting as quickly as possible.

MULTISPLIT

Multiflexi has 4 indoor split units: it is possible to control climate in 4 rooms with just a single outdoor motor.

PURE SYSTEM 2

A multi-filtering system combines an electrostatic filter (which removes small particles such as smoke, dust, pollen, pet hair to prevent allergic reactions) with an activated carbon filter (which eliminates bad odours and inactivates any harmful gas that may be present).

WARM SYSTEM

Air conditioner with heat pump. Thanks to this function you can heat a room, replacing traditional heaters during in-between seasons or combined with them for added warmth.

INVERTER SYSTEM

This technology is designed to constantly adjust motor speed according to the temperature setting. It guarantees a 30% energy saving compared to motors applying traditional technology.

ENERGY CONSUMPTION
